## How to Use the DocuPen

1. Hold document with thumb and index finger on flat surface

2. Position the DocuPen with LED's to your left and align it at the top of your document

3. Press the button once for normal resolution , or press the button twice for high resolution setting and start gliding the DocuPen down your document

4. If red lights blink, then slow down, if you scan too slow, the scanner will turn off

5. Do not stop, lift or twist the DocuPen while scanning

6. When done scanning, LEDs will blink to save into memory

7. Scanner will now turn off

Normal Resolution Mode

High Resolution Mode
